

UHF Base Station Cutting Instructions

Pick your frequency from the bottom of chart and draw a straight line to top of chart.

Measure and cut each section L1, L2, L3 to the length in millimeters listed on left hand side of graph that corresponds to the intersecting line drawn from the bottom to top of chart.

Example:

If you wanted to use the antenna at 450Mhz

Cut section L1 - 435mm.

Cut section L2 - 325mm.

Cut section L3 - 374mm.

NOTE: Important before cutting antenna notice order sections are listed in on **BF406 Cutting Chart.**

L3 length is between L1 & L2
