

# ASTRO<sup>®</sup>25

## Network Security

### Keep intruders out and your network up and running.

Worms. Viruses. Hackers. Intruders. They can threaten the operability and security of your ASTRO<sup>®</sup>25 radio network in seconds. Thwart communications for hours. And ultimately, jeopardize the safety of your first responders.

Whether they originate from a laptop or a desktop, a remote site or removable media, computer viruses are invasive and pervasive. And just one of the many threats that can cripple your network.

#### Attacks are intentional, accidental and inevitable.

A technician logs on in the field. A laptop accesses your network to perform routine service. You download data or install a CD or DVD from a trusted source. Suddenly, your system is under siege. While hackers continually devise new ways to compromise computers, many attacks are inadvertent. In fact, the leading cause of network downtime is accidental infection.

Motorola brings unparalleled expertise, innovation, resources and support to make sure your communications are always available and always secure.

### Motorola helps ensure your entire system is secure.

Motorola safeguards your entire wireless network from attacks today and emerging ones tomorrow. We provide layers of protection, including:

- **Firewalls** to allow only identified radio traffic
- **Intrusion detection sensors** to alert for potential attacks
- **Demilitarized zone** that puts a buffer between your enterprise and radio network
- **Anti-virus software** to prevent infections from malicious code
- **Patching services** that defend against the latest computer vulnerabilities
- **Network security monitoring and pre-tested updates** for real-time prevention, detection and mitigation

### Insist on the highest level of preparedness.

Look to Motorola, your support partner in wireless technology and public safety solutions, to protect your radio network and your ability to respond. We bring unparalleled expertise, innovation, resources and support to make sure your communications are always available and always secure.

Protect. Prevent. Secure.
