

BC-72XLT_BC-92xlt Secret Keyboard Trick

You can use Close Call Feature has conventional Frequency Counter (scout, aceco) pressing

HOLD + 3 + 0 while Power ON

Screen will show stronger freq detected.

By default it only scan UHF you can switch to Hi-VHF pressing Up arrow.

You check with a ham radio, PMR , GMRS, etc. It will display frequency used.

This should also work on PRO-83
